Patch Collection for the 2022 upgraded Prophet-600

Preliminary remarks

The idea of MIDI SysEx patches is, of course, that you can transfer patches created on one instrument to a computer and to another instrument and in that way archive, manage and share sounds. However, on a VCO synthesizer like the Prophet-600 with its hardware related variations it can be difficult to faithfully reproduce the sound of a patch from on a unit. While the VCO differences are handled by the hardware supported tuning routine, there are other components which cannot be calibrated and which can have a significant impact on the sound, such as:

- Filter resonance
- Oscillator cross modulation
- Pulse width

The patches documented below have been tested on a few different units and some care has gone into making them as transferable as possible. Still, you should pay particular attention to those patches with a high level of oscillator FM / cross modulation (at least when sync is inactive). Generally such patches are highly tuning sensitive. In addition, it may be necessary to adjust either oscillator A frequency or the poly-mod oscillator B amount on your instrument in order to achieve a clean sounding patch. This is because, the absolute poly-mod level is not normalized and slightly varies from instrument to instrument. Worst of all, there might be variations among the voices. If that is the case with your Prophet-600, you may find it difficult to use strong ploy-mod in a clean and consistent way. Please refer to the user manual for more information on how to use poly-mod properly.

The following 100 patches are grouped in 10 self-explanatory ”patch types”. For each patch some selected key information is provided. The idea is that this is helpful to recognize how the sound of the patch is created and supports using those patches as a starting point for new patches. In that sense the collection is not only intended to readily usable but is also to some degree educational about the features of the Prophet-600. The additional information is as follows:

- Envelope Routing: This shows if a non-standard routing is used. The comment may indicate why this waa chosen.
- Oscillator FM: This gives an indication of the strength of poly-mod oscillator modulation, i.e. when target oscillator A is active the number of stars indicate the amount of oscillator B source.

- Filter FM: this gives an indication of the strength of poly-mod filter modulation, i.e. when target filter is active the number of stars indicate the amount of oscillator B source.
- Sync: Indicates whether oscillator sync is active.
- Harmonic filter: This indicates if full tracking is active with a filter resonance close to self-resonance. Under these conditions the filter serves as chromatically tuned third oscillator.
- Unison: This indicates if the patch uses unison.
- Velocity: The default setting is that patch velocity is medium for amplitude and zero for filter cut-off. The velocity information marks patches for which more depth in expression is supported when played via external MIDI.
- Comments: Any specific useful information about the patch.

Note to developers: the patches contain patch names according to the MIDI specification. The Prophet-600 cannot (yet) display patch names, but they could be shown in MIDI patch editors.

Piano type patches

Nbr.	Patch Name	Contributor	Envelope Routing	Oscillator FM	Filter FM	Sync	Harmonic Filter	Unison	Velocity	Comments
Piano type patches										
00	GliGli Clavi	Andy								
01	Chorus EP	Jpro600k			***					
02	Piano 2	imogen		**					Yes	
03	Tap me twice	imogen							Yes	LFO retrigger on key, increase LFO amount
04	PWM Piano	Jpro600k			**					
05	Vocal Piano	Jpro600k			****					
06	EP	imogen							Yes	
07	Pianorganism	imogen								
08	Plain Piano	imogen		*					Yes	
09	Pianet	imogen		*****		Yes			Yes	FM adds a little bell-like timbre
Pad patches 1										

Nbr.	Patch Name	Contributor	Envelope Routing	Oscillator FM	Filter FM	Sync	Harmonic Filter	Unison	Velocity	Comments
10	Poly Glide	Z80 Nbr. 3								
11	Soft Poly	el-folie								
12	Kometenmelodie	el-folie								
13	5th Sweep	Andy								
14	Slow Atmo Brass	Jpro600k			**					
15	Forever 80s	imogen		**						
16	Fly By	el-folie								
17	Falling Asleep	imogen		**						
18	Night Drive	imogen					Yes			
19	Blade Runner	Matrix12x			*				Yes	LFO retrigger on key
Lead and melody patches										
20	Center Stage	el-folie						Yes		Unison note pattern (0-12)
21	Common Sync	imogen	Gate	****		Yes			Yes	LFO targets only oscillator A
22	DCO	imogen		**	**			Yes		Unison note pattern (0-12-24)
23	I told you	el-folie						Yes		
24	Fuzz Guitar	Matrix12x				Yes		Yes	Yes	Single voice unison
25	Cut	el-folie						Yes		
26	PW Pad	Matrix12x						Yes		
27	Moogys	imogen	Gate	**	**			Yes		
28	Fusion	el-folie						Yes		
29	Melody	Matrix12x						Yes		Single voice unison
Brass type patches										
30	Bread & Butter	imogen							Yes	
31	Bread & Marmite	imogen		***						Added creamy spectrum compared to 30
32	Trombone Set	imogen			*					
33	Attack Brass	Jpro600k								
34	Bright Brass	imogen		*	*	Yes				This requires a very evenly calibrated poly-mod
35	Mild Brass	Jpro600k								
36	Elegiac Brass	el-folie			*****					Effect of strongy filter FM

Nbr.	Patch Name	Contributor	Envelope Routing	Oscillator FM	Filter FM	Sync	Harmonic Filter	Unison	Velocity	Comments
37	Orchestral 1	Jpro600k		****	****	Yes				Poly-mod to for complex timbre and transient
38	Orchestral 2	imogen			**					Filter FM creates brass top end
39	Orchestral 3	Jpro600k		**	**	Yes				Poly-mod to for complex timbre and transient
Bass patches										
40	Attack Bass	el-folie						Yes		
41	Bassically	imogen	Poly	***		Yes				Filter emulation by envelope sync modulation
42	Double Bass	imogen	Poly	****						Transient pitch modulation for picking sound
43	Funkey	Matrix12x						Yes		
44	Yaz Bass	Matrix12x								
45	Unison Dark Bass	imogen			****			Yes		
46	Slap Bass	imogen		**		Yes		Yes		FM adds to the timbre of hitting string hard
47	Unison Full-Bass	Z80 Nbr. 27						Yes		Single voice unison
48	Deep Square Bass	el-folie						Yes		
49	Performance	imogen		*						
Natural instrument patches										
50	Space Oboe	imogen			*****	Yes				
51	Wind Organ	imogen	Gate	**		Yes				LFO targets only oscillator A
52	Totally Trumpet	imogen	Gate	***		Yes				2nd envelope used to model attack transient
53	My Spinett	imogen		**						
54	Space Oboe Chord	imogen			*****	Yes		Yes		Unison pattern (0-3-7-8) with glide, based on 50
55	Wood Block	imogen		*						
56	Club Organ	Z80 Nbr. 18								
57	Chiffy Organ	Z80 Nbr. 40								
58	Harmonica	Z80 Nbr. 33				Yes				
59	Reso Flute	Andy					Yes			
Effect patches										
60	Cave	imogen		**	**		Yes			Artefacts from interference of oscillator and filter FM
61	Pulsar	Andy				Yes				
62	Vox Humana	Matrix12x							Yes	

Nbr.	Patch Name	Contributor	Envelope Routing	Oscillator FM	Filter FM	Sync	Harmonic Filter	Unison	Velocity	Comments
63	Moskito	Jpro600k		***	***	Yes				
64	Voice	Matrix12x			*****					
65	AW Laser Harp	Andy			*****		Yes			
66	Beyond Jupiter	imogen	Gate	**	**			Yes		
67	Comet Stopover	el-folie			*****		Yes			
68	Bubble Bobble	imogen								LFO retrigger on key, LFO targets only oscillator A
69	Simmons Toms	imogen		***						
Stab patches										
70	Fifths	imogen		**						LFO targets only oscillator A
71	Wake Up!	imogen		**	**					
72	One Two Three	imogen	Poly							LFO retrigger on key, LFO targets only oscillator A
73	Pulsify	imogen	Poly	***		Yes				LFO targets only oscillator A
74	Phase	el-folie		*						
75	Noisy Stuff	imogen				Yes				
76	Harmonic Release	imogen	Poly							Envelope pitch shift releases 2 oscillators to a fifth
77	Noisy Stab	Matrix12x			***			Yes		Noise LFO modulates oscillator B for noise emulation
78	Soft Stab	imogen		**					Yes	
79	Crispy	imogen	Poly	***	***					
Bell type patches										
80	Crystal	imogen	Poly	***						
81	Snow Bell	Jpro600k			***					
82	Glockenspiel	imogen	Poly	**	**					
83	Dew	imogen		*						
84	Gong	imogen		*****						Extreme FM
85	Chime	imogen		*	*					
86	Tinkerbell	imogen	Poly	****						
87	High Bells	imogen	Poly	***						
88	Flute Bells	imogen		**	**		Yes			
89	Steel Bars	imogen	Poly	***		Yes				

Nbr.	Patch Name	Contributor	Envelope Routing	Oscillator FM	Filter FM	Sync	Harmonic Filter	Unison	Velocity	Comments
Pad patches 2										
90	Cold Wind	imogen		*****						
91	Psycho Choir	imogen					Yes			LFO targets only oscillator A
92	Strings I	Z80 Nbr. 2								
93	Foggy Strings	Andy								
94	Retro Pad	Jpro600k			**					
95	Pulse Mod I	Z80 Nbr. 53			***					
96	Wobbly Church	imogen	Poly	****		Yes				LFO targets only oscillator A
97	Room Strings	Jpro600k								
98	SH Pad	imogen		*						LFO retrigger on key
99	Shimmer	el-folie		**
